SUMMARY

Senior Software Engineer with 5+ years delivering full stack TypeScript systems, customer-facing products, and back-office software. Builds REST API Services on AWS and uses Claude Code and Codex daily for AI-assisted development. Works in Advanced/C1 English with US teams and US-hours overlap.

SKILLS

Languages: TypeScript | JavaScript | Java | Node.js | Go

Frontend and Mobile Apps: React Native

Backend: REST API Services | Express | Koa | OpenAPI/Swagger | BullMQ | RabbitMQ | AMQP

Data: PostgreSQL | DynamoDB | Redis | Drizzle ORM | Sequelize

Cloud and DevOps: AWS | Datadog | GCP | Docker | Kubernetes | ArgoCD | CI/CD | LaunchDarkly | OpenFeature | Auth0

AI-assisted development: Claude Code | Codex | Agentic workflows | Vitest | Jest

EXPERIENCE

DexCare

Jan 2026 - Present

Senior Software Engineer

Remote

- Enable high-quality AI-assisted development in daily delivery by building Claude Code and Codex environments with shared rules, lint, complexity limits, and tests.
- Reduce release risk by 7% by shipping React on AWS with LaunchDarkly/OpenFeature flags and Datadog RUM monitoring.
- Reduce authentication friction by 25% and isolate tenants with Auth0 JWT and OpenAPI/Swagger on multi-tenant REST API Services.
- Deliver real-time booking by building event-driven TypeScript and Node.js services with Express and Koa.
- Reduce wrong bookings by 15% by synchronizing hospital time slots through an Epic EMR integration.
- Serve booking data by modeling PostgreSQL with Sequelize and Drizzle ORM, DynamoDB Streams, and Redis.
- Reduce new-client pilot friction by 33% by helping implement SPI shared services with isolated configuration, secrets, and data.

Luizalabs

Jan 2024 - Jan 2026

Mid-level Software Engineer

Remote

- Delivered electronic invoice issuing for Magazine Luiza by building distributed tax microservices in Node.js, Java, and Go.
- Kept services reliable in production by deploying Docker and Kubernetes on GCP through ArgoCD, gated by Vitest and Jest in CI/CD.
- Improved invoice throughput by 20% and fault tolerance by moving SEFAZ communication to asynchronous BullMQ queues.
- Cut support tickets by 18% by exposing fiscal workflows through back-office dashboards.

Lippaus Distribuidora

Jan 2023 - Jan 2024

Mid-level Software Engineer

Remote

- Turned customer requirements into delivered solutions by leading project scoping and stakeholder communication.
- Supported nationwide expansion by building a multi-tenant web and React Native mobile platform on PostgreSQL.
- Increased processing capacity by 26% for high-volume orders, notifications, and integrations through asynchronous BullMQ jobs.

Lippaus Distribuidora

Mar 2021 - Jan 2023

Entry-level Fullstack Software Engineer

Remote

- Delivered customer-facing features end-to-end by balancing business requirements with technical constraints.
- Supported operations by building JavaScript back-office dashboards for a beverage distribution startup.

EDUCATION

FAESA

Feb 2022 - Dec 2025

Bachelor's degree, Information Systems

Vitória, ES, Brazil
