SUMMARY

Senior Software Engineer with 5+ years building scalable backend systems, Core APIs, and microservices in TypeScript and Node.js, with Go used at Luizalabs. Ships real-time healthcare scheduling with SQL, DynamoDB, and Redis and uses AI-driven agentic workflows in daily delivery. Works in Advanced/C1 English.

SKILLS

Languages: TypeScript | Node.js | Go | JavaScript

Backend and Multi-tenant security: Core APIs | Microservices | Express | Koa | OpenAPI/Swagger | RabbitMQ | AMQP | BullMQ

Data: SQL | PostgreSQL | DynamoDB | Redis | Drizzle ORM | Sequelize

Frontend: React | React Native

Cloud and operations: AWS | Docker | Kubernetes | GCP | ArgoCD | CI/CD | Datadog | LaunchDarkly | OpenFeature | Auth0

Testing: Vitest | Jest

AI tooling: Claude Code | Codex | Agentic workflows

EXPERIENCE

DexCare

Jan 2026 - Present

Senior Software Engineer

Remote

- Deliver real-time data processing over DynamoDB Streams for Core APIs by building event-driven TypeScript and Node.js backend services with Express and Koa.
- Cut authentication friction by 25% and isolate tenants by enforcing Auth0 JWT and OpenAPI/Swagger contracts on multi-tenant services.
- Serve booking data by modeling SQL data in PostgreSQL with Sequelize and Drizzle ORM and Redis on AWS.
- Lower release risk by 7% by shipping with LaunchDarkly/OpenFeature flags and monitoring React through Datadog RUM and browser logging.
- Reduce wrong bookings by 15% by synchronizing hospital time slots through an Epic EMR integration.
- Enable agentic workflows to produce high-quality code by building Claude Code and Codex environments with shared rules, lint, complexity limits, and tests.
- Decrease new-client pilot friction by 33% by helping implement SPI shared services with isolated configuration, secrets, and data.

Luizalabs

Jan 2024 - Jan 2026

Mid-level Software Engineer

Remote

- Delivered electronic invoice issuing for Magazine Luiza by building distributed tax microservices in Java and Go.
- Improved invoice throughput by 20% and fault tolerance by moving SEFAZ communication to asynchronous BullMQ queues.
- Improved production-grade service reliability by deploying Docker and Kubernetes on GCP through ArgoCD and using Vitest, Jest, and CI/CD.
- Cut support tickets by 18% by exposing fiscal workflows through back-office dashboards.

Lippaus Distribuidora

Jan 2023 - Jan 2024

Mid-level Software Engineer

Remote

- Increased processing capacity by 26% for orders, notifications, and integrations through asynchronous BullMQ jobs.
- Built a multi-tenant web and React Native mobile platform on PostgreSQL.
- Turned customer requirements into delivered solutions by leading project scoping and stakeholder communication.

Lippaus Distribuidora

Mar 2021 - Jan 2023

Entry-level Fullstack Software Engineer

Remote

- Supported operations by building JavaScript back-office dashboards.
- Delivered customer-facing features end to end by balancing business requirements with technical constraints.

EDUCATION

FAESA

Feb 2022 - Dec 2025

Bachelor's degree, Information Systems

Vitória, ES, Brazil
