## SUMMARY

I am a Senior Software Engineer with 5+ years of strong programming experience with JavaScript/TypeScript/Node.js, focused on backend development. I build healthcare scheduling systems and multi-tenant APIs on AWS, and I have shipped Go systems. I integrate AI-driven agentic workflows into daily delivery. My English level is Advanced/C1.

## SKILLS

**Programming:** TypeScript | JavaScript | Node.js | Go

**Backend and architecture:** Express | Koa | REST APIs | OpenAPI/Swagger | design patterns [UNVERIFIED] | reliability [UNVERIFIED] | scalability [UNVERIFIED]

**Data and messaging:** PostgreSQL | DynamoDB | Redis | Drizzle ORM | BullMQ | RabbitMQ

**Frontend:** React

**Cloud and operations:** cloud-native on AWS [UNVERIFIED] | GCP | Docker | Kubernetes | CI/CD | Datadog | LaunchDarkly

**Leadership:** mentoring [UNVERIFIED] | tech-lead responsibilities [UNVERIFIED] | stakeholder communication

**Testing and AI tooling:** Vitest | Jest | Generative AI [UNVERIFIED] | Claude Code | Codex | agentic workflows

## EXPERIENCE

### DexCare

Jan 2026 - Present

Senior Software Engineer

Remote

- Built event-driven TypeScript services with Express and Koa that delivered real-time visit booking by using design patterns [UNVERIFIED] for reliability [UNVERIFIED] and scalability [UNVERIFIED].
- Integrated Epic EMR time-slot flows that kept bookable slots synced with hospital records and reduced wrong bookings by 15%.
- Built multi-tenant REST APIs with Auth0 JWT and OpenAPI/Swagger validation that isolated tenant data, enforced API contracts, and reduced authentication friction by 25%.
- Reduced release risk by 7% by shipping behind LaunchDarkly/OpenFeature flags and monitoring React with Datadog RUM.
- Helped build cloud-native on AWS [UNVERIFIED] shared services with DynamoDB and Redis, reducing new-client pilot friction by 33% through isolated configuration, secrets, and data stores.
- Built Generative AI [UNVERIFIED] development environments with Claude Code and Codex that improved daily delivery quality by enforcing shared rules, lint, complexity limits, and tests in agentic workflows.

### Luizalabs

Jan 2024 - Jan 2026

Mid-level Software Engineer

Remote

- Built distributed tax microservices in Node.js, Java, and Go that delivered electronic invoice issuing for Magazine Luiza's e-commerce operation.
- Moved SEFAZ communication to asynchronous BullMQ queues, improving invoice throughput by 20% and fault tolerance.
- Built back-office dashboards on tax microservices that gave operations visibility into fiscal workflows and cut support tickets by 18%.
- Kept production services stable by deploying with Docker and Kubernetes on GCP and gating CI/CD with Vitest and Jest.

### Lippaus Distribuidora

Jan 2023 - Jan 2024

Mid-level Software Engineer

Vitória, ES, Brazil

- Built a multi-tenant web and mobile platform on PostgreSQL that supported nationwide retailer expansion.
- Processed high-volume orders, notifications, and integrations with 26% more capacity through asynchronous BullMQ jobs.
- Led project scoping that turned customer requirements into delivered React Native solutions by coordinating stakeholder communication, mentoring [UNVERIFIED], and taking tech-lead responsibilities [UNVERIFIED].

### Lippaus Distribuidora

Mar 2021 - Jan 2023

Entry-level Fullstack Software Engineer

Vitória, ES, Brazil

- Built internal back-office dashboards in JavaScript that supported operational workflows by translating business requirements into customer-facing features.

## EDUCATION

### FAESA

Bachelor's degree, Information Systems

Feb 2022 - Dec 2025

Vitória, ES, Brazil
