SUMMARY

I am a Senior Software Engineer with 5+ years of experience in Node development using TypeScript, Node.js, React, and Go. I build scalable healthcare scheduling and electronic invoicing systems. I have an Advanced English level: Advanced / C1 from daily work with a US team. I integrate AI-driven agentic workflows into delivery.

SKILLS

Languages and runtimes: TypeScript | JavaScript | Node.js | Go | Java

Backend and architecture: Express | Koa | REST APIs | OpenAPI/Swagger | BullMQ | microservices and cloud platforms [UNVERIFIED]

Data and messaging: SQL and NoSQL databases [UNVERIFIED] | PostgreSQL | DynamoDB | Redis | RabbitMQ | AMQP

Practices: SOLID principles [UNVERIFIED] | clean code [UNVERIFIED] | scalable solutions | software design patterns [UNVERIFIED]

Delivery and testing: automated tests and CI/CD pipelines | Vitest | Jest

Methods: version control systems [UNVERIFIED] | Git [UNVERIFIED] | Intermediate agile methodologies management [UNVERIFIED]

Cloud and operations: AWS | GCP | Docker | Kubernetes | ArgoCD | Datadog | LaunchDarkly | OpenFeature | Auth0

Frontend and AI tooling: React | Claude Code | Codex | Agentic workflows

EXPERIENCE

DexCare

Jan 2026 - Present

Senior Software Engineer

Remote

- Built microservices and cloud platforms [UNVERIFIED] that delivered real-time visit booking and provider availability by developing TypeScript and Node.js services with Express, Koa, and AWS.
- Reduced wrong bookings by 15% by synchronizing Epic EMR time slots across SQL and NoSQL databases [UNVERIFIED] with PostgreSQL, DynamoDB, Redis, RabbitMQ, and AMQP.
- Reduced authentication friction by 25% by designing multi-tenant REST APIs as scalable solutions with Auth0 JWT and OpenAPI/Swagger.
- Improved daily delivery quality by applying SOLID principles [UNVERIFIED], clean code [UNVERIFIED], software design patterns [UNVERIFIED], version control systems [UNVERIFIED], Git [UNVERIFIED], and automated tests in Claude Code and Codex environments.
- Reduced release risk by 7% by shipping React features behind LaunchDarkly/OpenFeature flags and monitoring them with Datadog RUM.

Luizalabs

Jan 2024 - Jan 2026

Mid-level Software Engineer

Remote

- Built distributed tax services that delivered electronic invoice issuing by using Java and Go for Magazine Luiza's e-commerce operation.
- Improved invoice processing throughput by 20% by moving SEFAZ communication to asynchronous BullMQ queues.
- Cut support tickets by 18% by building JavaScript back-office dashboards that exposed fiscal workflow status.
- Kept production services reliable by deploying Docker and Kubernetes to GCP through ArgoCD and gating CI/CD pipelines with Vitest and Jest automated tests.

Lippaus Distribuidora

Jan 2023 - Jan 2024

Mid-level Software Engineer

Vitória, ES, Brazil

- Supported nationwide retailer expansion by developing entire applications from scratch [UNVERIFIED] as a multi-tenant web and mobile platform on PostgreSQL.
- Increased processing capacity by 26% by running orders, notifications, and integrations as asynchronous BullMQ jobs.
- Delivered customer requirements as scoped solutions through project scoping and stakeholder communication, applying Intermediate agile methodologies management [UNVERIFIED].

Lippaus Distribuidora

Mar 2021 - Jan 2023

Entry-level Fullstack Software Engineer

Vitória, ES, Brazil

- Built customer-facing and back-office features that supported operational workflows by using JavaScript and balancing business requirements with technical constraints.

EDUCATION

FAESA

Feb 2022 - Dec 2025

Bachelor's degree, Information Systems

Vitória, ES, Brazil
