SUMMARY

I am a Senior Software Engineer with 5+ years building web applications with TypeScript, Node.js, React, and Go. I build enterprise APIs and integrations for healthcare scheduling. I integrate AI coding assistants and agentic workflows into daily delivery.

SKILLS

Languages: TypeScript | JavaScript | Node.js | Go

Web engineering: React | APIs | integrations | Express | Koa | OpenAPI/Swagger

Engineering practices: clean code | testing | debugging | maintainability | requirements analysis | Vitest | Jest | Datadog

AI tooling and communication: Claude Code | Codex | AI coding assistants | agentic workflows | Advanced English (C1)

EXPERIENCE

DexCare

Senior Software Engineer

Remote

Mar 2026 - Present

- Built enterprise healthcare scheduling APIs that supported real-time booking and provider availability by integrating React with TypeScript services on Express and Koa, working daily in English with US teams.
- Improved maintainability across services by using Vitest and Jest for testing, Datadog for debugging, and lint and complexity limits for clean code.
- Built agentic workflows with Claude Code and Codex as AI coding assistants that accelerated daily delivery while enforcing code quality.
- Reduced wrong bookings by 15% by building Epic EMR integrations that kept time slots synchronized with hospital records.
- Reduced authentication friction by 25% by building multi-tenant REST endpoints with Auth0 JWT and OpenAPI/Swagger validation.

Luizalabs

Mid-level Software Engineer

Remote

Jan 2024 - Mar 2026

- Delivered electronic invoice issuing for Magazine Luiza's e-commerce operation by building distributed tax microservices in Node.js and Go.
- Improved invoice processing throughput by 20% by moving SEFAZ communication to asynchronous BullMQ queues.
- Cut support tickets by 18% by building fiscal back-office dashboards in JavaScript for operational visibility.

Lippaus Distribuidora

Mid-level Software Engineer

Vitória, ES, Brazil

Jan 2023 - Jan 2024

- Supported nationwide retailer expansion by building a multi-tenant web and mobile platform on PostgreSQL.
- Increased order and notification processing capacity by 26% by moving workloads to asynchronous BullMQ jobs.
- Turned customer requirements into delivered solutions by leading project scoping and stakeholder communication and by analyzing requirements to guide technical implementation decisions.

Lippaus Distribuidora

Entry-level Fullstack Software Engineer

Vitória, ES, Brazil

Mar 2021 - Jan 2023

- Supported operational and administrative workflows by building internal back-office dashboards in JavaScript.

EDUCATION

FAESA

Bachelor's degree, Information Systems

Vitória, ES, Brazil

Feb 2022 - Dec 2025
