SUMMARY

I am a Senior Software Engineer with 5+ years building TypeScript, Node.js, React, and Go systems. I build full-stack healthcare scheduling products, multi-tenant APIs, and reliable cloud services. I integrate AI-driven agentic workflows into daily delivery.

SKILLS

Languages: TypeScript | JavaScript | Node.js | Golang

Frontend: React | CSS

Backend and data: REST APIs | API design | SQL | PostgreSQL

Cloud and operations: Google Cloud Platform (GCP) | Docker | Kubernetes | CI/CD

Practices and AI tooling: testing | deployment | remote work | Claude Code | Codex | Agentic workflows

EXPERIENCE

DexCare

Senior Software Engineer

Remote

Mar 2026 - Present

- Delivered real-time provider availability by building TypeScript and React scheduling interfaces with CSS and event-driven services.
- Kept booking data consistent across SQL stores by modeling reads and writes in PostgreSQL with Sequelize and Drizzle ORM.
- Improved API design, as measured by a 25% reduction in authentication friction, by building multi-tenant REST APIs with Auth0 JWT and OpenAPI/Swagger validation.
- Reduced wrong bookings by 15% by integrating Epic EMR time-slot flows with hospital records.
- Reduced release risk by 7% by shipping services behind LaunchDarkly/OpenFeature flags and monitoring them with Datadog.
- Improved daily delivery quality in remote work by building Claude Code and Codex environments with lint, complexity, and testing enforcement.

Luizalabs

Mid-level Software Engineer

Remote

Jan 2024 - Mar 2026

- Delivered electronic invoice issuing for Magazine Luiza's e-commerce operation by building distributed tax microservices in Node.js and Golang.
- Improved invoice throughput by 20% by moving SEFAZ communication to asynchronous BullMQ queues.
- Kept production services reliable through testing and deployment by running Docker and Kubernetes on GCP with CI/CD.

Lippaus Distribuidora

Mid-level Software Engineer

Vitória, ES, Brazil

Jan 2023 - Jan 2024

- Supported nationwide retailer expansion by building a multi-tenant web and mobile platform on PostgreSQL.
- Increased processing capacity by 26% by moving high-volume orders, notifications, and integrations to BullMQ jobs.
- Turned customer requirements into delivered solutions by leading project scoping and stakeholder communication.

Lippaus Distribuidora

Entry-level Fullstack Software Engineer

Vitória, ES, Brazil

Mar 2021 - Jan 2023

- Supported operational and administrative workflows by building internal back-office dashboards in JavaScript.
- Delivered customer-facing features end to end by balancing business requirements with technical constraints.

EDUCATION

FAESA

Bachelor's degree, Information Systems

Vitória, ES, Brazil

Feb 2022 - Dec 2025
