SUMMARY

I am a Senior Software Engineer with 5+ years of backend development in TypeScript, Node.js, and Go. I build event-driven healthcare scheduling and multi-tenant services on AWS. I work daily in English with US teams, and I integrate AI-driven agentic workflows into development.

SKILLS

Languages: TypeScript | JavaScript | Node.js | Go

Backend: APIs | event-driven | microservices | distributed systems | Express | Koa | BullMQ | RabbitMQ

Data: PostgreSQL | DynamoDB | Redis | Drizzle ORM | Sequelize

Frontend: React | React Native

Cloud and operations: AWS | GCP | Docker | Kubernetes | ArgoCD | CI/CD | Datadog | LaunchDarkly | OpenFeature | Auth0

Testing, AI, and communication: Vitest | Jest | Claude Code | Codex | Agentic workflows | Advanced English (C1)

EXPERIENCE

DexCare

Senior Software Engineer

Remote

Mar 2026 - Present

- Supported real-time booking and provider availability by building event-driven TypeScript APIs on Express and Koa with RabbitMQ messaging and DynamoDB tables.
- Reduced wrong bookings by 15% by integrating Epic EMR time-slot flows across distributed systems with PostgreSQL-backed scheduling data.
- Reduced authentication friction by 25% by building REST APIs with Auth0 JWT and OpenAPI/Swagger validation.
- Reduced release risk by 7% by shipping features behind LaunchDarkly and OpenFeature flags and monitoring them with Datadog RUM.
- Improved daily delivery quality by building Claude Code and Codex environments with shared rules, lint enforcement, complexity limits, and tests.
- Reduced new-client pilot friction by 33% by helping replace per-customer AWS deployments with shared multi-tenant microservices and isolated configuration, secrets, and data stores.

Luizalabs

Mid-level Software Engineer

Remote

Jan 2024 - Mar 2026

- Delivered electronic invoice issuing for Magazine Luiza's e-commerce operation by building distributed tax services in Node.js and Go.
- Improved invoice processing throughput by 20% by moving SEFAZ communication to asynchronous BullMQ queues.
- Reduced support tickets by 18% by building back-office dashboards that exposed fiscal workflow status to operations teams.

Lippaus Distribuidora

Mid-level Software Engineer

Vitória, ES, Brazil

Jan 2023 - Jan 2024

- Increased processing capacity by 26% by running high-volume orders, notifications, and integrations through asynchronous BullMQ jobs.
- Supported nationwide retailer expansion by building a multi-tenant web and mobile platform with PostgreSQL and React Native.

Lippaus Distribuidora

Entry-level Fullstack Software Engineer

Vitória, ES, Brazil

Mar 2021 - Jan 2023

- Supported operational and administrative workflows by developing JavaScript back-office dashboards for a beverage distribution startup.

EDUCATION

FAESA

Bachelor's degree, Information Systems

Vitória, ES, Brazil

Feb 2022 - Dec 2025
